nimbyx

nimbyx, a Vancouver-based software development company, is offering a **four-month internship (September-December 2018)** at its office in Manila, Philippines. nimbyx was founded by Paolo Kalaw, who was recently profiled by [Business in Vancouver](#) in an article highlighting the digital disruption currently rippling through the healthcare industry. In 2017 nimbyx was recognized by the [Globe and Mail](#) as one of five companies that took successful action in a competitive global digital economy.

Through this internship opportunity, nimbyx's Technology Interns will grow and sharpen their skills in a rapidly growing market in the world's most dynamic region. The company's Philippines office is located in Bonifacio Global City (BCG), a financial and lifestyle district in Metro Manila. It shares a neighbourhood with global and Canadian brands such as Google, Sun Life, Unilever, Nissan, JPMorgan Chase, and others.

This internship is part of the ***Philippines Connect* program**, a partnership between nimbyx and the Asia Pacific Foundation of Canada (APF Canada). APF Canada is a not-for-profit organization focused on being Canada's catalyst for engagement with Asia and Asia's bridge to Canada. *Philippines Connect* is one of several new internship programs aimed at giving Canadian students valuable exposure to some of the world's most dynamic regions. Technology Intern

nimbyx is looking for an intern who is passionate about creating world-class technology products. You have a unique opportunity to collaborate across multiple functions and experience the rich culture in Manila, Philippines while working with us to develop impactful solutions to complex, real-world problems. We are looking for students who are passionate about technology and eager to learn in our high energy, fast-paced environment.

The Successful Candidate

You are a highly motivated, purpose-driven individual with a strong work ethic and high degree of urgency familiar with rapid iterations. You are both smart and very curious, always seeking to gain greater insights and to look around corners. As an individual contributor, you understand that this is inherently a "roll-up-your-sleeves" role that requires you to demonstrate ownership of your project. You have the ability to apply critical thinking as you solve problems, you can communicate with honesty and openness, you understand that you need to build trust so people can follow you, and you are passionate about lifelong learning.

Description

This is a full-time position for the duration of the internship program based in our Manila office. You will have a direct impact to customer experience as you contribute

in user-facing features of our products and are able to see your work go live quickly. As an intern, you will have complete ownership of your work. You'll have the opportunity to work for side-by-side with our dynamic and fun team while learning under the mentorship of senior engineers. The scope of work is not limited to the mentioned specifications. If there rise an occasion where your contribution is needed, you are expected to step up and fill the shoes.

A day in the life of a nimbyx Tech intern

- You ask thoughtful questions to ensure you are solving the right problems.
- A quick daily stand up meeting to sync with your scrum team
- You take ownership of your work and are open to peer feedback on coding standards, principles and patterns.
- You can be depended on to proactively communicate your progress to stakeholders and ensure timely project delivery.
- You value reliability, ensured by automated testing (unit, integration and load tests)
- You participate in code reviews to ensure code quality, continuous integration and deployment
- You adapt easily to meet the needs of our rapidly evolving business environment

Qualifications

- Pursuing a Bachelor's Degree in Computer Science, Computer Engineering, Management Information Systems, or a related technical discipline with emphasis on computer programming
- Proficiency in at least one programming language or technology including, but not limited, to C#, .NET, Javascript, HTML, CSS and Objective-C
- Working knowledge of Object Oriented Programing, and Software Development Life Cycles (SDLC)
- Ability to work both independently or collaboratively as the situation necessitates
- Highly detailed and organized
- Must be able to work in a fast-paced start up environment

Compensation

- In lieu of a salary, the intern will receive a **one-time award of C$7,000** to cover travel and living expenses in Manila. APF Canada and nimbyx will provide assistance in applying for a visa.

To apply, send your CV, cover letter (addressed to HR Manager), and transcripts (official or unofficial) to Zining Wang at zining.wang@asiapacific.ca by Saturday, June 30, 2018.
